(54) ALARM CLOCK

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an alarm clock resolving wasteful electric power consumption and surely awaking the user.

SOLUTION: When it comes to an alarm time, a clock part 1 outputs an alarm signal, a control circuit 6 operates an alarming circuit 7a and the alarming circuit 7a performs alarming with minimum sound volume in the three levels. At this moment, the control circuit operates a human body movement detector 5 and initiates the detection of movement of the user in the
